

Today Chris-Craft is back to doing what it did a century ago—building high quality sportboats that add to the legend every day.

THE CHRIS-CRAFT SPORTBOAT SHOW. 41 MODELS FROM 17-39 FEET.

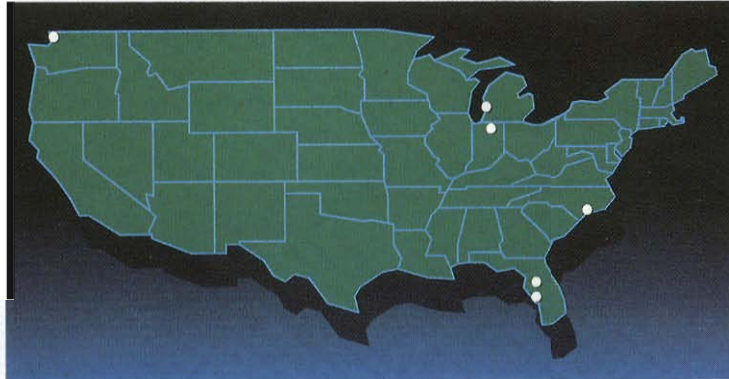

The 1986 line of Chris-Craft sportboats is a boat show in itself. As you leaf through this brochure, you'll discover entry level boats, bowriders, center consoles, cuddy cabins, ski boats, family getaway cruisers, ultra performance models, fishing machines... even a cat.

As America's oldest powerboat manufacturer, Chris-Craft has always presented an extensive number of models. The reason is simple. Not only does Chris-Craft appeal to a major portion of the marine market, the wide variety allows Chris-Craft's loyal family of owners to stay in the family, even if their needs, interests or hobbies change.

One of the reasons Chris-Craft owners exhibit such loyalty is the fact that a Chris-Craft, any Chris-Craft, is

a rare combination of unmistakable value—quality at an affordable price. Chris-Craft's remarkably low prices are in part a direct result of strategic

plant location. With 6 facilities from Washington state to Michigan to Indiana, North Carolina and Florida, delivery costs are significantly reduced.
