

215 SUNDOWNER

AFFORDABLE FAMILY CRUISING

In many boaters minds, the 215 Sundowner is ideally sized...big enough to handle coastal waterways...not too big for inland lakes. Like all Four Winns boats the 215 is built tough to provide years of enjoyment and service. Hand lay-up woven roving fiberglass assures a lightweight deep-vee hull of great integrity. Beneath the floor is a fiberglass encapsulated solid wood five stringer foundation. Rigid cell foam flotation fills all the floor cavities. Strong and light balsa core laminated in fiberglass reinforces the deck. Full width and depth fiberglass encapsulated

plywood fills the transom, with extra wood inserted where the engine meets the outdrive. Where the hull and deck are joined, and where stainless steel hardware is attached, wood backing assures that stainless steel fasteners cinch securely. A welded aluminum fuel cell is mounted in the floor and accessible through a removeable panel. These are added value features of the 215 Sundowner and other Four Winns boats that make it possible for us to back them with the exclusive *Winning Edge 3-Year Owner Protection Plan**...boating's best protection plan. **■**
