Bob,  
How is the quote coming? I thought we were close yesterday. Just to reiterate here is the list of parts I requested last Monday, December 1st.

Pistons and rings (4.50 bore and 4.375 stroke 9.80 short deck) **Discussed adding hard anodizing and skirt coating on 03DE and shooting for 8.25-8.4 CR**

✓ AFR heads complete per your recommendation  
✓ Associated valve train to upgrade heads for application  
Head studs for proposed heads  
Hydraulic roller cam shafts (55mm)  
Morel 0.903 hydraulic roller lifters  
Push rods for application (length TBD)

Best regards,  
Scott Stinebring

Bob, Here are a few pictures of our Skater. These were taken by Pete Bowden of Shoot 2 Thrill Pix. I dont have any of us "aired out" as you requested. If you would like high resolution of any of these maybe we could get the file from Pete. I also have one from Naples Imagery included as well.
